

HiTECHnologies introduce the following new module:

The InfraLOGIC 100 is a general purpose IO module for Remote Access & Control of process or machine data with an INTERNAL MOBITEX modem.

The InfraLOGIC 100 module is available as Din Rail module with general purpose I/O for:

- 8 Digital inputs,
- 8 Digital outputs,
- 2 Analog inputs for Voltage, Temperature sensors or 4-20 mA current loop sensors,
- 1 Analog output.

The InfraLOGIC 100 has an embedded BASIC interpreter for easy programming. Direct command set for control over all I/O from remote or local console port.

The InfraLOGIC 100 is ideal for Machine to Machine applications (M2M)

MOBITEX networks offer M2M users a highly secure network fit for business critical applications.

Applications:

- Wireless Automation & Control
- Alarm alerts
- Monitoring and data logging

Application fields:

- Service
- Security
- Facility management
- Logistics
- AMR
